

**Title:** Environmental Project Manager

**Company:** American Geosciences, Inc.

**About American Geosciences:** American Geosciences is a leading environmental consulting firm specializing in due diligence, site investigations, and site remediation. We help clients (developers, attorneys, commercial lenders, manufacturers, etc.) across various industries navigate complex environmental issues.

**Job Description:**

American Geosciences is seeking an experienced and knowledgeable Environmental Professional to join our team.

**Responsibilities:**

1. Review Phase I ESA (Environmental Site Assessment) reports and site-related information necessary to finalize report.
2. Develop and implement Phase II site investigations, supervise field activities, manage subcontractors, and coordinate with senior managers.
3. Work with junior level staff to coordinate the start, implementation, and completion of projects.
4. Evaluate the results of Phase II ESAs and other investigation activities.
5. Prepare draft and final reports.
6. Lead and manage environmental consulting projects from inception to completion, ensure compliance with applicable requirements.
7. Collaborate with multidisciplinary teams, including geologists, hydrogeologists, and environmental scientists, to achieve project objectives. Potentially supervise small staff.
8. Prepare applicable reports outlined under site-specific voluntary clean-up programs.
9. Communicate effectively with clients, regulatory agencies, and stakeholders to ensure project goals are met and expectations are exceeded.

## **Qualifications:**

1. Bachelor's degree in Environmental Engineering, Civil Engineering, or Geology. Professional accreditation preferred.
2. 10+ years of experience in environmental consulting, with a focus on site assessment and remediation.
3. Understanding of Pennsylvania's Act 2 laws and regulations.
4. Proven track record of successfully managing environmental projects within budget and schedule constraints.
5. Strong analytical and problem-solving skills.
6. Excellent written and verbal communication skills, with the ability to effectively communicate technical information to diverse audiences.
7. Experience working with regulatory agencies, such as the Pennsylvania Department of Environmental Protection (PA DEP).
8. Ability to work independently and as part of a team environment.
9. Proficiency in environmental modeling software and GIS tools preferred.

Joining American Geosciences offers the opportunity to work on diverse and challenging environmental projects while making a positive impact on the communities we serve. We offer competitive compensation and benefits, including health insurance, retirement plans, and professional development opportunities.
